

FOR EMAIL & DIGITAL AGENCIES

Flawless emails.

One-click sign-off.

Give your whole team a single, consistent QA and client sign-off process — regardless of which ESP each client sends from.

96%

of emails contain at least one error
before sending

seconds
SENDCLEARED

14

automated checks run on every
email
SENDCLEARED

WHY USE SENDCLEARED?

One hub, any ESP

Klaviyo here, Mailchimp there — SendCleared sits above all of them, so your process never fragments client by client.

Any ESP

A full accountability chain

Internal QA, account manager review, and client approval — all logged, timestamped, and visible to your team.

3 seats included

An audit trail that holds up

When a client asks “did we actually approve this,” you have a real answer — not a Slack scroll.

Audit trail

HOW IT WORKS

1

Send your test email

One persistent inbox address per client, added to their ESP's test list once.

2

QA runs automatically

14 automated checks run on every test send, visible to your whole team.

3

Fix and re-run

Fix issues in the ESP, re-send, re-run. Full version history per client.

4

Client signs off, you're covered

A magic approval link replaces the Slack thread, timestamped and on record.

Send with confidence.
Every single time.

Your first 3 approval links are free. No credit card required. Set up in 2 minutes — just add your SendCleared address to your ESP test list and you're ready to go.
