

✓ FOR EMAIL & DIGITAL AGENCIES

Flawless emails. One-click sign-off.

Give your whole team a single, consistent QA and client sign-off process — regardless of which ESP each client sends from.

Free tier available. Agency plan from \$49/mo · 20 client inboxes, 3 team seats

96%

of emails contain at least one error
before sending

SENDCLEARED

14

automated checks run on every
email

SENDCLEARED

WHY IT'S WORTH SWITCHING

One hub, any ESP

Klaviyo here, Mailchimp there —
SendCleared sits above all of them,
so your process never fragments
client by client.

Any ESP

A full accountability chain

Internal QA, account manager review,
and client approval — all logged,
timestamped, and visible to your
team.

3 seats included

An audit trail that holds up

When a client asks “did we actually
approve this,” you have a real answer
— not a Slack scroll.

Audit trail

HOW IT WORKS

1

Connect each client

One persistent inbox address
per client — add it to their
ESP's test list once.

2

QA runs automatically

14 automated checks run on
every test send, visible to your
whole team in seconds.

3

Fix and re-run

Fix issues in the ESP, re-send
the test, re-run — full version
history per client.

4

Client signs off, you're covered

A magic approval link replaces
the Slack thread, with a
timestamp and name on record.

**Send with confidence.
Every single time.**

Your first 3 approval links are free. No credit card required. Set up in 2 minutes — just add your
SendCleared address to your ESP test list and you're ready to go.
